

Objectives

- Make decisions on the Solitaire software development project.
- Learn unit testing and GUI programming in the language of your choice.

Deliverables and Grading Policy

Read the “CS 449 Homework Overview” document carefully and make the key decisions for the software

development. Use the following template to complete your report.

1. Key Decisions of the Solitaire Project (2 points)

Topic Decision

Object-oriented programming language (if not using OOP, then justify the use of the language): Java

GUI library (strongly encouraged): java FX

IDE (Integrated Development Environment): eclipse

xUnit framework (e.g., JUnit for Java): Junit 5

Programming style guide (must read it carefully): google java style guid

Project hosting site Github.com

Other decisions if applicable

Sample programming style guides:

- Google Java Style Guide: <https://google.github.io/styleguide/javaguide.html>
- Google C++ Style Guide: <https://google.github.io/styleguide/cppguide.html>
- Google Python Style Guide: <https://google.github.io/styleguide/pyguide.html>

2. Unit testing (4 points)

Find a tutorial on the unit test framework you have chosen and write at least two xUnit tests of a program you have

written or found elsewhere. Attach here (1) the screenshot of your program execution and (2) the source code of your program.

For example, Junit5 user guide: <https://docs.junit.org/5.10.3/user-guide/index.html>

3. GUI programming (4 points)

Write a GUI program in the language you have chosen for your Solitaire project. The GUI of your program must include text, lines, a check box, and radio buttons. In this assignment, any GUI program of your own work is acceptable.

Attach here (1) the screenshot of your program execution and (2) the source code of your program.
